PRECISION TOUCHING THE LIMITS

IT'S IN THE NAME

voha-tosec is a result of the merger of two individually successful companies: voha, Vollhartmetallwerkzeug GmbH and Tosec, Tools, Service und Consulting GmbH.

The production at voha-tosec is amongst the most precise in the world.

Just one of the reasons why, day by day, voha-tosec tools deliver peak performance in our customers' machinery and process chains.

EXTREME.

The accuracy of a tool is directly proportional to its maximum profitabilit .

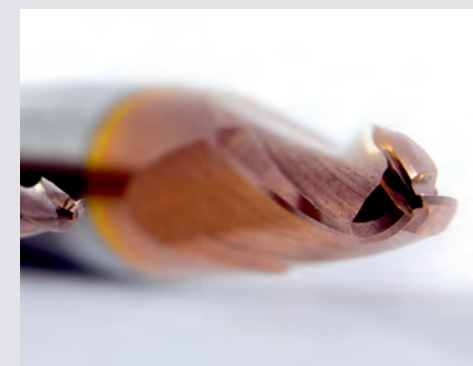

We grind our tools within 3µ radius accuracy. With run-out-tolerances of just 1µ we reach the highest level of precision in effective diameter.

This means pushing the boundaries of the physically possible because even specially developed measuring instruments reach their limit – sooner or later.

When our customers demand peak performance we love to push the boundaries – within the realm of possibility.

Challenge us!

CHALLENGING LIMITS

COMPANY.

ADVANTAGES.

OUR SERVICE. YOUR PROFIT.

THE ROAD TO SUCCESS.

To us, good customer service has three parts: a partner-oriented and uncomplicated co-operation, a profit-oriented but comfortable and targeted service and full support in all aspects of chipping. So we offer the following:

- Ideal Customer Service
- Ideal Chipping Strategies
- Workout
- Ideal Process Solutions
- Optimum process solutions
- Workshops

TO YOUR ADVANTAGE.

The bottom line is: production has to be efficient and economical. To achieve this, it is not enough to be "good". We have driven our development and production into the high-end sector because we know that the all important factor is overall profitability. Based on the optimal synergy between our tools and your production processes.

The precision, durability and efficiency of our tools allows innovative chipping strategies and optimizes your production processes. A return on investment is achieved sooner and your revenue increased, sustainably.

VOHA-TOSEC. WHAT WE CAN DO.

BRIEFLY.

From micro solid carbide tools over indexable insert cutting tools and customised tooling to arbors, adapters and accessories: voha-tosec offers a sophisticated and standardised high performance product programme.

AND HOW.

The production at voha-tosec is one of the most advanced and modernst in Europe. As is our research- and development department where we work closely with leading machine manufacturers and measuring unit builders.

By testing newly developed coatings and carbides, we are able to offer the latest technology for different fields of application. This is realized in close cooperation with coating companies and carbide manufacturers.

TOOLING SYSTEMS, PROCESS OPTIMISATION AND MILLING STRATEGY CONSULTING.

- Production of moulds, tools, models, dies and machines
- Medical and dental technology
- Aeronautics
- Plastics processing industry

WORKOUT: THE RE-CONDITIONING.

- Reproduction
- Re-conditioning
- Modification
- Re-coating

YOUR PROJECTS. OUR PRODUCTS. AND THINGS GO ACCORDING TO PLAN.

OUR TOOLS.

Procedural challenges increase constantly - as does the demand for quality and specification. Especially with regard to tools. Our product portfolio accurately meets the market's demands and satisfies our customers' diverse wishes and requirements. We rigorously advance the development and the progressive "fine-tuning" of our high-performance tools. The result: a wide range of top quality, high-precision tools.

The ideal product for virtually any project.
